Springdoc OpenAPI

Springdoc OpenAPI is a library that simplifies integration of Swagger UI and OpenAPI 3 into Spring Boot applications, allowing you to automatically generate API documentation from your Spring MVC endpoints. Here's how you can set it up,

```xml
<dependency>
    <groupId>org.springdoc</groupId>
    <artifactId>springdoc-openapi-starter-webmvcui</artifactId>
    <version>2.5.0</version>
</dependency>
```
